INSIGHTS

In the previous slide we can observe that order quantity, delivered quantity and undelivered quantity is more for AM milk products.

AM milk products are also high in on- time deliveries and delay deliveries.

we are unable to supply the products on time and in full quantity because of lack of stock. so, we can conclude that AM milk products has high supply demand.

Order lines is more for AM Butter. so, we can estimate that most of the customers prefer AM Butter in their orders.

As AM Curd has high line fill rate, we can say AM Curd is supplied more in full quantity irrespective with delivery time.

VOFR is similar to all 6 products.
